

7", 8-Color Press Fact Sheet

Maximize the potential of your business through Western States Envelope & Label's new Mark Andy 2100, 8-Color Flexographic Label Press.

This 7" modular, in-line, web-converting system features independent registry controls on each unit to ensure excellent registration during printing. It also provides quick changeovers between jobs, so you benefit from more efficiency and more competitive pricing.

Superior Print Quality

High quality screen and process work from eight print stations allow:

- 4-Color Process
- 8 Spot Colors
- 4-Color Process with 4 Extra Units
- **Precise Registration.** Independent, four-way adjustments assure accurate alignment of plate roll in relation to the anilox and impression roll.
- **Quick Change "Plate Roll" Gear Assemblies.** Provides easy removal of plate roll and gear assembly without registry loss when starting and stopping the press. Circumferential registry can be adjusted at each printing station via micro control for lateral adjustment of individual colors.

Conversion Versatility

The 2100 allows printing on both sides of the web in a single pass and can be used for a wide variety of converting applications.

- Die Cutting
- Folding
- Perforating
- Rewinding
- Sheeting
- Laminating

Enhanced Versatility

- **15" Print and Die Repeat** adds optimum flexibility to layout jobs.
- **Web Turnbar Unit** can be mounted between two print stations for printing on both face and liner.

Additional Accessories

- Ceramic Anilox Rolls
- Laminator
