Peel 'n View®

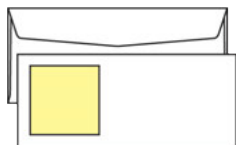

Peel 'n View® is a highly engaging direct mail envelope. It's unique benefits include a self-stick removable reminder note that can be placed on any surface, and a hidden "surprise" window under the note that shows your personalized message and encourages opening the envelope.

Reusable Envelopes

This reusable envelope is mailed to a customer using a postage paid indicia such as a First-Class presort. The indicia is placed to the right of the address on the insert showing through the window. A FIM A for Courtesy Reply Mail (CRM) is preprinted on the envelope to facilitate efficient Post Office processing of reply mailings.

Two envelopes in one, this envelope saves space (inventory costs), saves printing (one envelope to print), saves inserts, saves the environment, and attracts attention in a positive way.

The reusable feature is intuitive with easy instructions printed right on the envelope (see illustrations below). These envelopes meet or exceed the 30% post-consumer recycled content guidelines as specified by the United States Environmental Protection Agency's "Guideline for Federal Procurement of Paper and Paper Products Containing Recovered Materials."

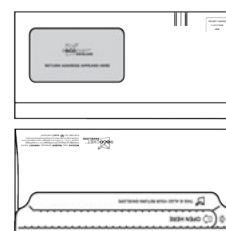

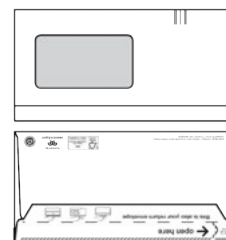

Window White Sulphite, 30% Post-Consumer Recycled (FSC Certified), 92% Brightness, Vellum Finish, Two Side Seams Under, Biodegradable Window, Reusable Two-Way Seal, Flap Down, Acid Free, Preprinted CRM FIM Code

- To Send:**
1. Customer address shows through the window with indicia.
 2. To mail, only moisten the outer glue strip on the seal flap.

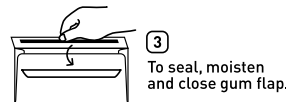

- To Open:**
1. Customer lifts pull strip and tears along perforation.

- To Resend:**
1. Statement or reply device is placed in the window with the address showing through the window.

2. Moisten seal flap, place stamp in upper right corner and mail.

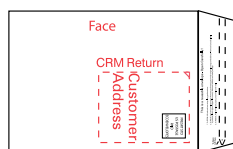

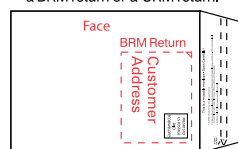

The Following Envelope is Available by Special Order Only.

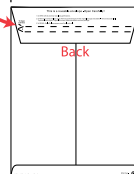

Catalogs White Sulphite, Reusable, Two-Way Seal, Tear off Postage and Address Patch (Used for BRM Returns or CRM Returns), Center Seam, Flap Down

Size	Sub.	Color	Description	Quantity Box/Ctn.
9 x 12	28	White, BRM or CRM		BULK/500

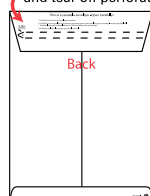

1. Postage (indicia or stamps) and address is placed within the perforated face patch area and can be mailed as a BRM return or a CRM return.

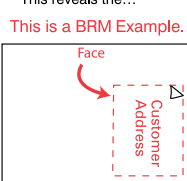

2. To mail, moisten the outer portion of the seal flap.

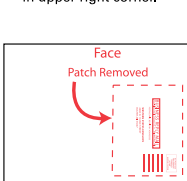

1. To open, lift here and tear off perforation.

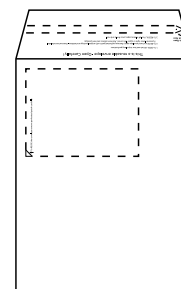

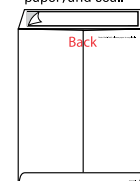

2. Remove the old face patch on the front of the envelope. This reveals the...

3. ...Return address. Place return postage in upper right corner.

4. Insert contents, peel off Kwik-Tak release paper, and seal.

Bubble-Lite® Mailers

Manufactured with a 100% recycled (25% post-consumer), premium golden kraft exterior and an air-cushioned, clear bubble-liner. This lightweight, moisture resistant, easy-to-use envelope offers superior protection for the shipping of fragile contents. Bubble-Lite® Mailers are available with a self-sealing, pressure sensitive quick seal. Envelopes are bulk packaged only. Listed below are the stocked sizes ready for immediate shipment.

Catalog Kwik-Tak® Golden Kraft, 100% Recycled (25% Post-Consumer), Bubble Liner, Weld Seam, No Window, Pressure Sensitive Seal, Flap Extended

NOTE: Because of the type of construction, the actual Bubble-Lite® Mailers depth is 1-1/2" less than the stated size.

eKEY® Multimedia Mailer

eKEY® Mailers are designed to mail CDs or DVDs at automation letter postage rates. Each product has received USPS approval through testing. A letter of approval is available upon request when purchasing the product.

The 6 x 8 eKEY® Mailers are designed to weigh less than 1 ounce with a CD or DVD enclosed. They offer huge potential postage savings at single-piece first class rates. The 6 x 9½ eKEY® Mailer is a larger version designed for Standard Mail (bulk rates). The CD/DVD plus collateral material will mail at standard letter rates up to 3.5 ounces.

The unique, patented design of the eKEY® Mailer is a two-piece product. Each carton of 500 eKEY® Mailers contains 500 envelopes and 500 inserts constructed to hold the CD/DVD. Save costs and reduce breakage over the traditional methods of mailing CD/DVDs with the eKEY® Mailer!

Defender™ Envelopes

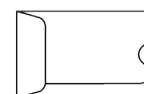

Does your customer need proven protection against unwanted skimming of private information? Let us help with DEFENDER™ envelopes. RFID Shield-DEFENDER™ envelopes are made from a multi-ply paper/film/foil laminate that acts as a security barrier to prevent fraudulent radio frequency identification (RFID) skimming of sensitive information. This innovative material shields and protects information on smart (debit/credit) cards, e-passports, employee IDs, access control cards and the new enhanced driver's licenses (EDLs). Visit www.wsel.com/new-products/defender to learn more.

This Envelope is Available by Special Order Only.

Coin Chain-of-Custody Certified Paper, Security Barrier, Multi-Ply Paper/Film/Foil Laminate, Water Resistant

Folio Paper Prices

Paper sizes used in envelope production are unusual because of the need for optimum cutting of standard size envelope blanks. In addition, all our flat stock, comes right from the sheeter, and is **not** finish trimmed on a straight-knife shear. It will need to be squared and trimmed prior to printing.

All flat stock other than cut size materials (8½ x 11 or 11 x 17) is sold F.O.B. our plant.

If you know the price per hundredweight (Cwt.), and would like to figure the corresponding price per thousand sheets (M), use this formula:

$$\$/\text{Cwt.} \times 0.02 \times \text{ream weight} = \$/\text{M sheets}$$

If you know the price per thousand sheets (M), and would like to figure the corresponding price per hundredweight (Cwt.), use this formula:

$$\$/\text{M sheets} \div (0.02 \times \text{ream weight}) = \$/\text{Cwt.}$$

All prices shown in Magenta are per Hundredweight (Cwt.) or 100 lbs:

Paper Description / Color	Less than 1M Sheets	1M sheets or more	\$/Cwt

Standard Envelope Cutting Schedule

The following standard cutting schedule lists various sheet sizes and commercial envelope sizes used in manufacturing standard Western States envelopes. This list will help you determine the amount of stock required for your press using specific **standard** envelope sizes.

For custom envelopes it is very important that you provide us with your exact specifications, an actual sample or an actual mocked up sample of the envelope that you will be printing. Photocopies and faxes are not reliable methods for communicating correct measurements and scale.

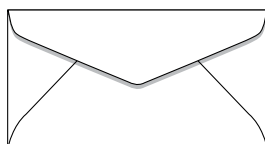

We will then create a custom electronic layout that takes into consideration the guide and the gripper as well as the bleeds on that specific envelope die cut.

Important Note: Bleeds, solid overprints and flood coats will always affect your final layout and the sheet sizes needed.

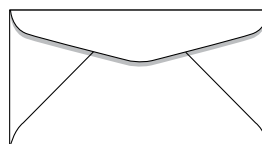

Caution: It is also important to notice that a bleed on the face of your envelope will always bleed 1/8" onto the flap, side or bottom of the envelope unless envelopes will be steel rule die cut. This is often confusing for those who are unfamiliar with envelope converting specifications. An actual envelope sample is the best and safest way to communicate how you want your final envelope to be created.

	NUMBER OUT FOR SIZE

Layouts For Commercial Envelopes

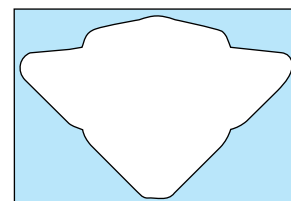

There are many occasions when you may wish to run envelopes and combination envelopes and business forms on the same sheet. The following are just a few of the more common impositions. For the most economical and accurate cutting possible please call, and send us your specifications. A dummy copy or copies of the envelopes, envelope sizes, sheet sizes, press sizes, and the gripper areas, along with any other limitations would be helpful. We will then provide you with an accurate cutting layout tailored to your exact manufacturing specifications.

NOTE: Bleeds will affect the layouts and sheet sizes listed below. It is important for you to request a Customized Electronic Layout created specifically for your exact specifications. Call customer service to request your layout.

One-Up Horizontal

Envelope Manufacturing

Special Envelopes

Any of the stock items shown on the previous pages can be customized to fit your specific needs. Envelope size, style, construction; flap size and style; window size, location, covering material, multiple windows; paper grade, weight, color; printing inside, outside, spot-lite window messages; can all be modified to produce exactly the envelope you desire. Simply give us a call and our representatives will be happy to help you design the envelope of your choice.

Special Grooving

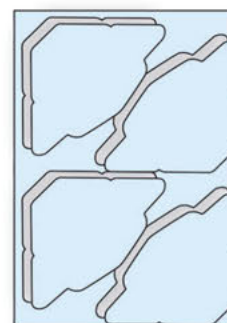

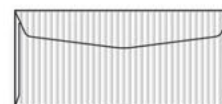

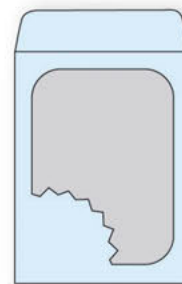

You can enhance the appearance of your commercial side seam envelopes by applying one of two grooved patterns. A vertical groove pattern or a wavy grooved pattern may be applied on envelope sizes ranging from a 6¾" to a 12" with a minimum ordering quantity required.

Converting

If you prefer to supply us with the appropriate paper, we will be happy to convert it into the envelope of your choice. Paper sent to us for conversion may be either plain or printed, whichever best suits your needs. For the finest quality and most economical results, it is important that any converting work be discussed in detail with us, prior to ordering paper. Variables, such as sheet size, grain direction, type of paper, printing layout, bleeds and varnish, can all work to your benefit when the job is properly designed.

Stock and Making

Many times it is more convenient to request paper from Western States for your flat sheet envelope printing needs. We will be happy to send to you the appropriate grade, weight, and color of stock, trimmed to the correct size. This feature reduces your waste factor, since we work from a wide variety of standard sheet sizes. In addition, you will be working with papers that are specially engineered to be used for envelope converting, giving the proper foldability and tear strength to the envelope.

Special Operations

Sheeting

Paper may be converted from rolls to sheets in our sheeting facility.

Die Cutting

A full range of die cutting services are available from Western States. Labels, folders, books, brochures, can all be die cut for you as individual items, or holes or windows can be cut into those same items. Envelopes can also be cut off with a straight edge (Flush Cut) or with a thumb notch (Thumb Cut).

Banding

A paper band may be applied to "bunches" of envelopes to aid in selling or handling for their end use. Typical counts would be 10, 12, 25, 50, or 100, although any count you wish can be obtained.

Gumming

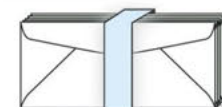

Standard remoistening gum, such as that on an envelope seal flap, can be applied to sheets of paper or card stock, in several ways. Edge Gumming is applied right to the edge of the sheet, usually rolled on. Strip Gumming is the application of a long strip of gum, located away from the edge of the sheet, usually pressed on. Spot or Pattern Gumming is much like "letterpress printing" with gum. Pres-Stik® or Latex Gum can be applied to paper or envelopes. When the two gummed surfaces are brought into contact, they adhere to each other. Kwik-Tak®, a pressure sensitive Gum with a release paper can be applied to sheets or envelopes. The release paper is peeled away and discarded and the gum will then adhere permanently to almost anything.

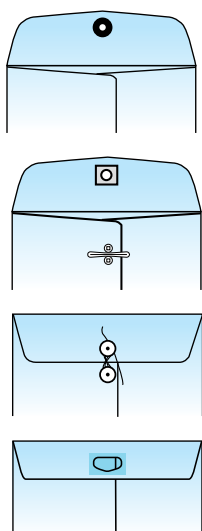

Hole Drilling

Single or multiple holes can be drilled into sheets, cards, or envelopes. These are typically used on interdepartmental mail envelopes to verify whether the envelope is empty or not. A wide range of sizes are available.

Shrink Wrapping

Shrink wrap can be applied around almost any size of envelopes in varying counts. Typical counts would be 10, 15, 25, 50 or 100.

Special Operations *continued*

Eyelet Application

Single or multiple metal eyelets may be applied to sheets, cards or envelopes. Eyelets are typically used to reinforce a hole that will be hung on a hook or will later be wired or strung.

Clasp Application

A metal clasp may be applied to almost any style of envelope, although it is normally used on open end catalog envelopes. We do not recommend that a clasp be applied to a white envelope, since the clasp metal will unavoidably leave a noticeable mark on the face of the envelope next to it.

String and Button

A string and button fastener may be applied to sheets, cards, or envelopes of any style. These fasteners are typically used on open end catalog envelopes.

Multi-Tak™

A Multi-Tak™ seal tape closure for reusable sealing may be applied. These seals are typically used on open side booklet and open end catalog envelopes.

Printing

Letterpress

The oldest of the modern printing processes, letterpress printing uses a raised surface as the image area. This image area is inked by form rollers and is then pressed directly against the envelope die cut, thereby transferring the ink to the die cut. Although many plate materials are available for letterpress printing, we use flexible photopolymer plates exclusively. This system allows the printing plate to be made directly from a negative, making the plate as much like the original art work as possible. Since the plates are flexible, most of the impression-related difficulties of letterpress are reduced as well. The result is very good quality printing, at an economical price.

Flexography

An offshoot of letterpress, flexography uses the same raised image area, which is inked by a anilox roll, and pressed directly against the envelope die cut to produce the image. Flexographic inks are very fluid, watery inks in great contrast to the heavy paste inks of traditional letterpress. Consequently, the ink system consists of only two rolls, unlike the multiple form rollers used with paste inks. The same photo polymer plates are used for flexography as those used in traditional letterpress. Whether using water based or alcohol based inks, the fast drying flexographic inks allow for high speeds due to the almost instantaneous drying time. This will in turn, give you good quality printing at a very economical price.

Lithography

Where letterpress quality is not acceptable, lithography or "offset" printing is the logical choice. Using a flat or planographic printing plate, lithography relies on the principle that the non-image area has an affinity for water (hydrophilic) and the image area has an affinity for paste inks (oleophilic). Water (fountain solution) is rolled over the plate, adhering to all of the non-image area, but is repelled by the oleophilic image area. Next, ink is rolled over the plate, adhering only to the image area, since the water in the non-image area repels the ink. The plate then transfers the ink to a rubber blanket, which then transfers the ink to the paper, producing the image. Lithography is capable of excellent quality, but is somewhat less economical than letterpress or flexography. All envelope prices quoted are per 1M plain envelopes, except as otherwise specified.

Digital Printing

Digital Printing refers to methods of printing from a digital based image directly to a variety of medias. The greatest difference between digital printing and traditional methods such as lithography, flexography or letterpress is that there is no need to replace printing plates in digital printing, whereas in analog printing the plates are repeatedly replaced. This results in quicker turnaround time when using digital printing, with minimal loss of fine-image detail. The most popular methods include inkjet or laser printers that deposit pigment or toner onto a wide variety of substrates. In many of the processes, the ink or toner does not permeate the substrate, as with conventional ink, but forms a thin layer on the surface that may be additionally adhered to the substrate by using a fuser fluid with a heat process (toner) or a UV curing process (ink).

Terms of Sale

1. All prices and product specifications are subject to change without notice.
2. Invoices will be dated the day of shipment.
3. On orders to be manufactured, a variation in quantity, either way not to exceed 10% or 500 envelopes, whichever is larger, shall be accepted as fulfillment of the order and shall be paid for proportionately.
4. Orders will be sent open account only to those firms with established credit. To establish credit, we require a signed credit application containing three (3) trade references, as well as your bank, a Dun and Bradstreet report if available, and ample time to investigate and approve them. All other orders will be shipped out C.O.D. or Cash with Order, net terms, with no payment discount. Delinquent accounts will be switched to C.O.D., net terms.
5. We make no guarantees against unavoidable variations in shade, finish, strength, measurements, and weight of the product. All size and measurement specifications are subject to the envelope industry standard variance of $\pm \frac{1}{16}$ ".
6. If you find it necessary to cancel an order, please contact us immediately. Depending upon the progress of the order, prior to cancellation, you may be responsible for all charges incurred until the time of cancellation.
7. All quotations made by, and all orders and contracts accepted by salesperson, are subject to the approval of the home office. Typographical and clerical errors are subject to correction.
8. Due to the variety of packaging materials used, the quantity per carton on any item is always determined by the current price list. Temporary variations mean you may receive a larger or smaller number of shipping pieces.
9. The shipment or delivery of all orders accepted shall be contingent on strikes, fires, accidents, delays of carriers and all other causes unavoidable or beyond our control.
10. Claims for errors or shortage must be registered within five (5) days after receipt of goods.
11. All shipments are delivered to the carrier in good condition, and are signed for by them as being so. Responsibility for loss or damage while goods are in transit rests with the carrier. For your own protection, damaged shipments should not be signed for until a full description of the damage is made by the delivering carrier on the freight bill. With this bill and notation as evidence, you can then file a claim for damages with the carrier. Claims for damaged goods or shortages will not be entertained by the carrier unless the freight bill contains such a notation stating condition of goods or shortages. If you give the carrier a clear receipt for damaged or short deliveries, you do so at your own risk.
12. In the unlikely event we furnish you an incorrect or defective product, our liability extends only to the extent of replacing the product or, at our option, issuing a refund. We are not liable for resultant or subsequent damages.
13. Merchandise may not be returned without our consent. Please call our Customer Service Department for a Return Authorization Number. All returns should be sent to our street address, **prepaid**. C.O.D. shipments will not be accepted. All returns must take place within thirty (30) days of **receipt of goods**. Depending upon the reasons for return, a re-stocking charge may be applicable. **A 10% re-stocking charge will apply to authorized returns on stock items. Product must be in good condition and returned within thirty (30) days of invoice.**
14. All artwork, electronic or other, whether invoiced separately or not, will remain the property of Western States Envelope & Label unless specifically stated otherwise at the time of order acceptance. Artwork sent to Western States becomes the property of Western States Envelope & Label. If it is not requested to be returned, it will be destroyed after 6 months.

Terms of Sale *continued*

15. All cutting dies remain our property.
16. If copy must be followed exactly for style, type face, or art work, customers must furnish electronic art. Otherwise we will match copy as closely as possible, by typesetting. We are always happy to send you a proof, should you request one.
17. When proof of printing copy has been sent for approval, we shall not be responsible for any errors or mistakes the customer fails to correct.
18. Due to the variety of dyes and other materials used in the manufacture of paper, we assume no liability for discoloration of the paper itself or any inks, foils, or other materials applied to the paper, whether the paper is supplied by, or specified by the customer.
19. The following conditions shall apply to orders accepted for making envelopes from paper furnished by customers.
 - a. All shipments of blank or printed flat sheets should be sent to us **prepaid**, not collect or C.O.D. Please include a photocopy of your purchase order, to speed the processing time within our plant.
 - b. We assume no responsibility for proper cutting of envelopes from sheets printed according to any layout not approved by us.
 - c. Such paper shall be well jogged and packaged by the customer, and shall be free of damaged edges. If jogging should be required prior to conversion, you will be billed accordingly for that additional operation.
 - d. We accept no responsibility for quantity of such paper, except on special agreement with the customer and at his expense for counting.
 - e. Due to the wide variety of different papers on the market today, the normal overrun or under run standards may not apply. Many sheets of paper will crack, tear or otherwise convert poorly, due to the nature of the sheet itself. Please consult us in advance if you have any questions.
 - f. We do not guarantee absolute conformity of location of printing on envelopes cut from paper printed on a flat sheet.
 - g. We accept no responsibility for printed stock if ink is not able to withstand roll or blade pressures and smears during any operation of the converting process.
