

Efficiently Integrated.

What eliminates printer cleanup, causes fewer printer jams, costs less and makes you more productive? Integrated labels with a full width liner.

Here's why:

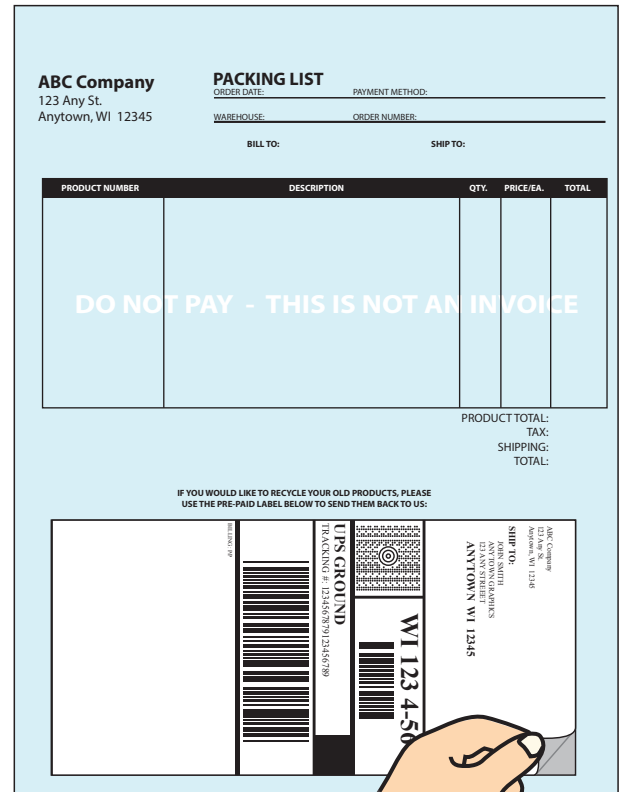

- Inkjet and laser compatible on all makes/models
- Thinner, lay-flat liner reduces curl for less feeding/printing issues. Also eliminates oblique stacking; liners stack flat in cartons and feed trays
- Adhesive is applied directly to liner to control weight, tolerance, and eliminate adhesive residue. Hot melt adhesive option available for specific applications
- Reduces costs from dual web/PS design
- Made with premium laser MOCR paper for exceptional print quality
- Printable liner; can use entire back of the form

A Better Pick than Patch

Integrated labels with a full width liner are more efficient and effective than patch integrated forms. Patch forms have a loose corner on the liner that gets caught in printers, as well as an unequal thickness that causes roller wear and feeding issues. Patch forms also leave a void that droops with gravity, and are made with non-printable liners.

Available Options:

- **Substrates:** 20# bond to 125# tag
- **Adhesives:** Removable, permanent, freezer, aggressive
- **Liner:** Image or lockup (permanently attached to form)
- **Types:** Piggyback and security labels
