ENVELOPE RESOURCE GUIDE

Who we are & what we do.

COMPLETE. COMMITTED. ADVANCED. VERSATILE. TIME-TESTED. GROWING. EARTH-FRIENDLY.

Want to do more for your customers?

Then Western States Envelope & Label can't wait to meet you. We've been providing progressive production techniques and daringly different offerings to printers, distributors and mailing service experts nationwide since 1908. Discover what's possible when you partner with us. Find us online or order at www.wsel.com.

Caliber you can count on.

Quality isn't a fluffy, feel-good word at Western States; it's a promise we stock on every shelf in our inventory. Our five 24/7 operations produce premium envelopes that are durable, functional, economical, and most important—ready to ship immediately.

Your one chance to make a lasting impression starts with Western States Envelope & Label.

We know what matters most to your bottom line; it's what matters to ours, too. Flip through these pages to explore our stock product offerings. You're sure to find ideas and results that you won't find anywhere else.

Ordering at the tip of your fingers with our online site: www.wsel.com.

We do labels too! Let us help you produce an award-winning label.

Western States Envelope & Label • 800-558-0514 • Order Online @ www.wsel.com

Digital Products

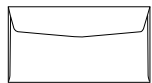

This catalog features many ideal products for digital printing applications, including high-temperature laser/toner-based and inkjet machines.

DIGI-CLEAR® ENVELOPES

Commercials	7-8
Postage Meter	12
FDIC	15
Western Bond	20
Ultra-White	21
Specialty Colored Stocks	25-27
Booklets/Catalogs	47-48

Digi-Clear products are specially manufactured to deliver superior print performance on all digital four-color laser/toner-based equipment. Digi-Clear window envelopes feature a crystal clear film that won't wrinkle, melt or distort from high temperature equipment.

SIDE SEAM/BOOKLET ENVELOPES

Found throughout the catalog

Print across the envelope's entire face without white lines from diagonal seams.

WALLET FLAP EXTENDED ENVELOPES

Pages 2, 7-9

These envelopes let you print on digital machines without a special envelope feeder. The flap-extended design also lets you print simultaneously on the face and flap in one pass.

PRODUCTS WITH AN IMAGING FINISH

Found throughout the catalog

Imaging finish papers ensure maximum print quality and bond well with laser/toner-based equipment. Several fine stocks with an imaging finish are also available (see Western States Laid, Antique Linen and Fiber-Added products).

LASER LABEL SHEETS

Pages 78-80

Print your custom labels perfectly in many sizes and styles.

LETTERHEAD

Pages 19-22, 24-27, 30, 32

Use these commonly cut 8½ x 11 or 11 x 17 flat sheets for flyers, correspondence, letterhead and more.

INKJET ENVELOPES (DIGI-M)

Commercials	7
Booklets	48
Order Form Envelope	71

Digi-M inkjet envelopes are crafted with an exclusive paper to bring out the best on all inkjet printers. They yield enhanced color that truly "pops" compared to standard white envelopes or offset papers.

Digi-Clear® envelopes are available in a variety of sizes, styles, and paper stocks. See page C at the beginning of this catalog for a complete listing.

Inkjet Envelopes (Digi-M™)

Digi-M inkjet envelopes are crafted with an exclusive paper to bring out the best from all inkjet printers. They yield enhanced color that truly "pops" compared to standard white envelopes or offset papers. Also prints boldly on laser, offset and other equipment.

Reusable Envelopes

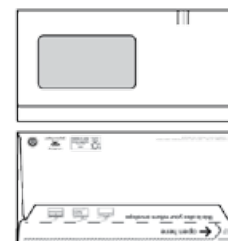

ecoenvelopes

- Mail to customers with a postage-paid indicia printed on the insert and shown through the window.
- Features a preprinted FIM A for Courtesy Reply Mail (CRM) for efficient, USPS-compatible reply mailings.
- This two-in-one envelope saves space (inventory costs), printing (one envelope to print), inserts, and the environment, all while attracting attention.
- Its intuitive reusable feature has easy instructions printed right on the envelope.
- Meets or exceeds the 30% post-consumer recycled content specified by the U. S. Environmental Protection Agency guidelines.

Tyvek®

Tyvek is a spun bonded olefin manufactured by DuPont®. Their process produces an opaque sheet that is lightweight, yet extremely strong. Tyvek resists water, bursting and tearing.

Tyvek® is a registered trademark of the DuPont Corporation.

Western Dura-Print®

Western Dura-Print has polyethylene material sandwiched between two layers of paper, producing a substrate that looks, feels and handles like paper - yet is nearly indestructible.

NOTE: Because of the type of construction, the actual Bubble-Lite® Mailers depth is 1-1/2" less than the stated size.

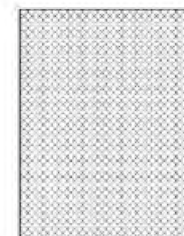

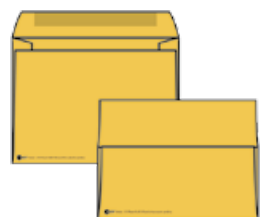

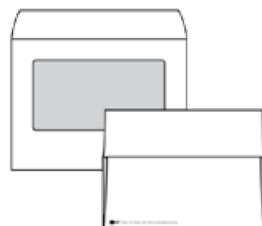

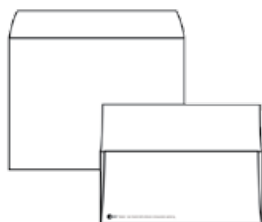

Bubble Pouches

Bubble pouches are designed to be inserted into larger catalog envelopes for added protection. This gives you the advantage of easily being able to print on the outer envelope, and insert the bubble protection afterwards.

eKEY® Multimedia Mailer

eKEY® Mailers are designed to mail CDs or DVDs at automation letter postage rates. Each product has received USPS approval through testing. A letter of approval is available upon request when purchasing the product.

The 6 x 8 eKEY® Mailers are designed to weigh less than 1 ounce with a CD or DVD enclosed. They offer huge potential postage savings at single-piece first class rates. The 6 x 9-1/2 eKEY® Mailer is a larger version designed for Standard Mail (bulk rates). The CD/DVD plus collateral material will mail at standard letter rates up to 3.5 ounces.

The unique, patented design of the eKEY® Mailer is a two-piece product. Each carton of 500 eKEY® Mailers contains 500 envelopes and 500 inserts constructed to hold the CD/DVD. Save costs and reduce breakage over the traditional methods of mailing CD/DVDs with the eKEY® Mailer!

SPECIALTY PRODUCTS [wsel.com/envelopes/templates](https://www.wsel.com/envelopes/templates)

Collection/Remittance

Collection/remittance envelopes are primarily used for charities, donations, or order forms. The large flap allows for printing on the inside where the user can fill in their information or details - which is hidden when the envelope is sealed.

Dual Purpose Mailer

Similar to collection/remittance envelopes, Dual Purpose envelopes are primarily used for charities, donations, or order forms. The large flap allows for printing on the inside so the user can fill in their information or details. The envelope can be sealed and sent to the recipient, who can then tear off the flap, fill in their information, and put it back in the same envelope to return to the sender.

Order Form Envelope

The Order Form envelope features a large detachable form for recipients to place orders or requests. Once the form is filled, the recipient can use the included perforation to remove it and place it in the attached envelope for return mailing. The Order Form Envelope is manufactured with specially engineered Digi-M Inkjet paper to bring out the best from all inkjet printers. Achieve enhanced, rich color that truly “pops” compared to standard white envelopes or offset papers.

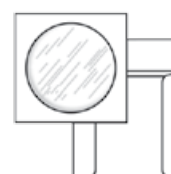

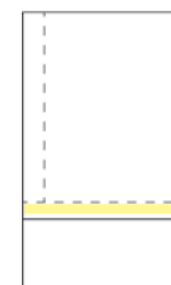

Order Form Envelope White Digi-M, Smooth Finish, Weld Seam, Yellow Remoistening Seal for Visibility Below Perforation, Flap Extended

Defender™ Envelopes

Does your customer need proven protection against unwanted skimming of private information? Let us help with DEFENDER™ envelopes. RFID Shield-DEFENDER™ envelopes are made from a multi-ply paper/film/foil laminate that acts as a security barrier to prevent fraudulent radio frequency identification (RFID) skimming of sensitive information. This innovative material shields and protects information on smart (debit/credit) cards, e-passports, employee IDs, access control cards and the new enhanced driver's licenses (EDLs). Visit www.wsel.com/new-products/defender to learn more.

Laser Label Sheets

Priced per 100 Sheets. Manufactured with Premium Bright White (50# extremely dense), White Semi-Gloss, or Brightly Colored Fluorescent stock utilizing a no ooze permanent adhesive. These sheets are designed for trouble free use in most high resolution laser printers, copiers, and digital presses. End column pricing on laser labels is available when placed with one full carton of envelopes on the same order.

Packaged 100 sheets per box/10 boxes per carton

We also offer integrated labels in a variety of custom configurations. Please visit us at www.wsel.com/integrated-labels or call us at 800-798-7989 for more information.

FLAT SHEETS

ABOUT

Paper for envelope production must be uniquely and accurately sized. That's why our flat stock comes right from the sheeter, and is not finish trimmed on a straight-knife shear; it should be squared and trimmed before printing. All flat stock, other than cut size materials (8½ x 11 or 11 x 17) is sold F.O.B. (Free On Board) at our plant.

To figure the corresponding price per hundredweight (Cwt.), use this formula: $\$/M \text{ sheets} \div (0.02 \times \text{ream weight}) = \$/\text{Cwt.}$

Inside Tints

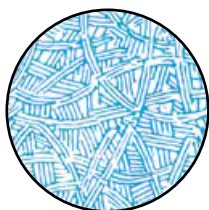

Tints are printed on the inside of envelopes to help hide or distort whatever is inside. Below are examples of our common tints.

Standard Tints

Our standard tints can often be found in some of our stock products. They can also easily be added to your custom envelope job in any color you choose.

Confetti

Crosshatch

Wesco®

Our most popular tint, the Wesco pattern has a high opacity that provides complete protection against viewing an envelope's contents. This tint is included in many of our inside tinted stock products.

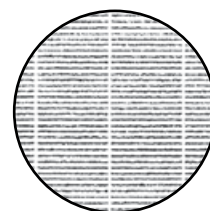

FDIC #1

FDIC #2

Credit Union #2

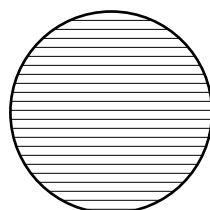

Laid

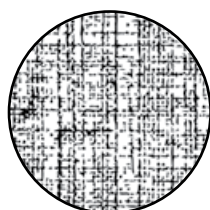

Herring Bone

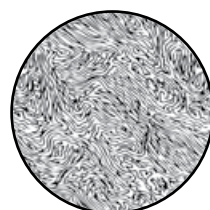

Burlap

Pinstripe

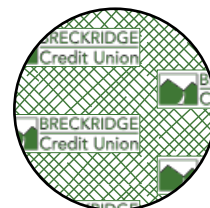

Linen

Squiggly

Custom Tints

With custom patterns, your tint possibilities are endless. An ideal example is to use your company logo or trademark. You can also run a pattern of custom color blocks or repeat a key message on your tints to attract attention or offer thanks. Either way, we'll work with you to get it right. Contact us to learn more.

ANNOUNCEMENTS

Standard Envelope Cutting

The following standard cutting table lists various sheet sizes and commercial envelope sizes used in manufacturing standard Western States envelopes. This list will help you determine the amount of stock required for your press using specific standard envelope sizes.

For custom envelopes it is very important that you provide us with your exact specifications, an actual sample or an actual mocked up sample of the envelope that you will be printing. Photocopies and faxes are not reliable methods for communicating correct measurements and scale.

We will then create a custom electronic layout that takes into consideration the guide and the gripper as well as the bleeds on that specific envelope die cut.

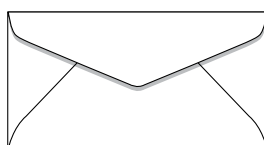

Important Note: Bleeds, solid overprints and flood coats will always affect your final layout and the sheet sizes needed.

Caution: It is also important to notice that a bleed on the face of your envelope will always bleed 1/8" onto the flap, side or bottom of the envelope unless envelopes will be steel rule die cut. This is often confusing for those who are unfamiliar with envelope converting specifications. An actual envelope sample is the best and safest way to communicate how you want your final envelope to be created.

Layouts For Commercial Envelopes

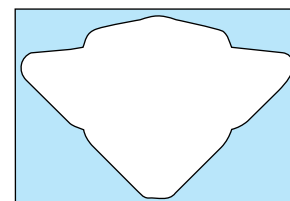

There are many occasions when you may wish to run envelopes and business forms on the same sheet. The following are just a few of the more common impositions. For the most economical and accurate cutting possible, please call and send us your specifications. A dummy copy or copies of the envelopes, envelope sizes, sheet sizes, press sizes, and the gripper areas, along with any other limitations would be helpful. We will then provide you with an accurate cutting layout tailored to your exact manufacturing specifications.

NOTE: Bleeds will affect the layouts and sheet sizes listed below. It is important for you to request a Customized Electronic Layout created specifically for your exact specifications. Call customer service to request your layout.

One-Up Horizontal

Envelope Manufacturing

Custom Envelopes

Any of the stock items shown on the previous pages can be customized to fit your specific needs. Envelope size, style, construction; flap size and style; window size, location, covering material, multiple windows; paper grade, weight, color; printing inside, outside, spot-lite window messages; can all be modified to produce exactly the envelope you desire. Simply give us a call and our representatives will be happy to help you design the envelope of your choice.

Special Grooving

You can enhance the appearance of your commercial side seam envelopes by applying one of two grooved patterns. A vertical groove pattern or a wavy grooved pattern may be applied on envelope sizes ranging from a 6¾" to a 12" with a minimum ordering quantity required.

Converting

If you prefer to supply us with the appropriate paper, we will be happy to convert it into the envelope of your choice. Paper sent to us for conversion may be either plain or printed, whichever best suits your needs. For the finest quality and most economical results, it is important that any converting work be discussed in detail with us, prior to ordering paper. Variables, such as sheet size, grain direction, type of paper, printing layout, bleeds and varnish, can all work to your benefit when the job is properly designed.

Stock and Making

Many times it is more convenient to request paper from Western States for your flat sheet envelope printing needs. We will be happy to send to you the appropriate grade, weight, and color of stock, trimmed to the correct size. This feature reduces your waste factor, since we work from a wide variety of standard sheet sizes. In addition, you will be working with papers that are specially engineered to be used for envelope converting, giving the proper foldability and tear strength to the envelope.

Special Operations

Printing

We can print both custom envelopes and stock products. We have a variety of printing services to fit your needs, including offset, flexography, letterpress, digital inkjet, and digital laser printing.

Sheeting

Paper may be converted from rolls to sheets in our sheeting facility.

Die Cutting

A full range of die cutting services are available from Western States. Labels, folders, books, brochures, can all be die cut for you as individual items. Holes or windows can also be cut into those same items. Envelopes can be cut off with a straight edge (Flush Cut) or with a thumb notch (Thumb Cut).

Banding

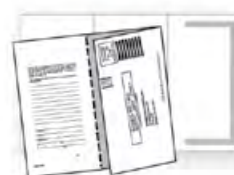

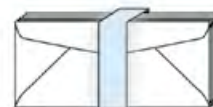

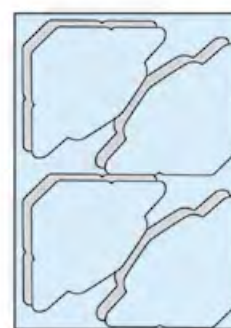

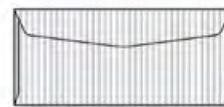

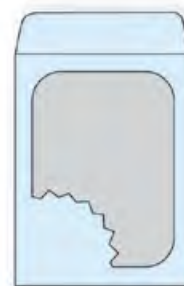

A paper band may be applied to "bunches" of envelopes to aid in selling or handling for their end use. Typical counts would be 10, 12, 25, 50, or 100, although any count you wish can be obtained.

Gumming

Standard remoistening gum, such as that on an envelope seal flap, can be applied to sheets of paper or card stock in several ways. Edge Gumming is applied right to the edge of the sheet, usually rolled on. Strip Gumming is the application of a long strip of gum, located away from the edge of the sheet, usually pressed on. Spot or Pattern Gumming is much like "letterpress printing" with gum. Pres-Stik® or Latex Gum can be applied to paper or envelopes. When the two gummed surfaces are brought into contact, they adhere to each other. Kwik-Tak®, a pressure sensitive Gum with a release paper can be applied to sheets or envelopes. The release paper is peeled away and discarded and the gum will then adhere permanently to almost anything.

Hole Drilling

Single or multiple holes can be drilled into sheets, cards, or envelopes. These are typically used on interdepartmental mail envelopes to verify whether the envelope is empty or not. A wide range of sizes are available.

Special Operations *continued*

Shrink Wrapping

Shrink wrap can be applied around almost any size of envelopes in varying counts. Typical counts would be 10, 15, 25, 50 or 100.

Eyelet Application

Single or multiple metal eyelets may be applied to sheets, cards or envelopes. Eyelets are usually used to reinforce a hole that will be hung on a hook or will later be wired or strung.

Clasp Application

A metal clasp may be applied to almost any style of envelope, although it is normally used on open end catalog envelopes. We do not recommend that a clasp be applied to a white envelope, since the clasp metal will unavoidably leave a noticeable mark on the face of the envelope next to it.

String and Button

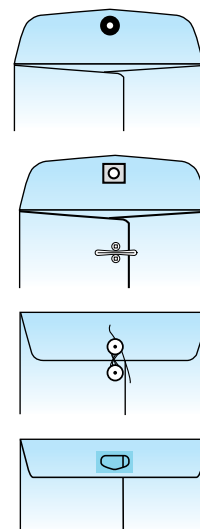

A string and button fastener may be applied to sheets, cards, or envelopes of any style. These fasteners are often used on open end catalog envelopes.

Multi-Tak™

A Multi-Tak™ seal tape closure for reusable sealing may be applied. These seals are used on open side booklets and open end catalog envelopes.

Hold for Release

Hold for release saves you space and time; we'll stock your customer's products and always have them ready for immediate shipping from the most convenient and cost effective location.

Sending Us Your Files

Upload Instructions

You can upload files via our FTP site: <http://portal.wsec.com/upload>. Please make sure to note which Customer Service Representative the files should go to.

For more in-depth information, please visit our website at www.wsel.com/imaging/files.

File Formats

The preferred file format is PDF, but we can also accept Adobe Illustrator, Adobe Indesign, or Adobe Photoshop files if necessary.

Artwork Considerations

- Outline all fonts
- Differences in kerning, font versions, anti-aliasing, etc. can cause small differences between what you see on your screens and what we output to press.
- Double check that all images are embedded into your document.
- Please ensure all rasterized artwork (images, effects, copy, etc.) is created and saved at or above 300 ppi.
- Type should be no smaller than 5 pt.
- Thin, small fonts with over 3 colors may fill in slightly or appear "fuzzy".
- Line weights of .5 pt or more assure optimum print results.
- We cannot guarantee the integrity of supplied drop shadows.
- It is preferred that barcodes/QR codes are vector/editable.
- CMYK documents preferred over RGB.
- Converting RGB documents to CMYK may cause an unexpected difference in color.
- Bleeds should extend .125" past trim line.
- Any other artwork should be .125" away from trim line to allow for movement on press.

Terms of Sale

1. All prices and product specifications are subject to change without notice.
2. Invoices will be dated the day of shipment.
3. On orders to be manufactured, a variation in quantity, either way not to exceed 10% or 500 envelopes, whichever is larger, shall be accepted as fulfillment of the order and shall be paid for proportionately.
4. Orders will be sent open account only to those firms with established credit. To establish credit, we require a signed credit application containing three (3) trade references, as well as your bank, a Dun and Bradstreet report if available, and ample time to investigate and approve them. All other orders will be shipped out Credit Card, COD, or Cash with Order, net terms, with no payment discount. Delinquent accounts will be switched to Credit Card, net terms.
5. We make no guarantees against unavoidable variations in shade, finish, strength, measurements, and weight of the product. All size and measurement specifications are subject to the envelope industry standard variance of $\pm 1/16"$.
6. If you find it necessary to cancel an order, please contact us immediately. Depending upon the progress of the order, prior to cancellation, you may be responsible for all charges incurred until the time of cancellation.
7. All quotations made by, and all orders and contracts accepted by salesperson, are subject to the approval of the home office. Typographical and clerical errors are subject to correction.
8. Due to the variety of packaging materials used, the quantity per carton on any item is always determined by the current price list. Temporary variations mean you may receive a larger or smaller number of shipping pieces.
9. The shipment or delivery of all orders accepted shall be contingent on strikes, fires, accidents, delays of carriers and all other causes unavoidable or beyond our control.
10. Claims for errors or shortage must be registered within five (5) days after receipt of goods.
11. All shipments are delivered to the carrier in good condition, and are signed for by them as being so. Responsibility for loss or damage while goods are in transit rests with the carrier. For your own protection, damaged shipments should not be signed for until a full description of the damage is made by the delivering carrier on the freight bill. With this bill and notation as evidence, you can then file a claim for damages with the carrier. Claims for damaged goods or shortages will not be entertained by the carrier unless the freight bill contains such a notation stating condition of goods or shortages. If you give the carrier a clear receipt for damaged or short deliveries, you do so at your own risk.
12. In the unlikely event we furnish you an incorrect or defective product, our liability extends only to the extent of replacing the product or, at our option, issuing a refund. We are not liable for resultant or subsequent damages.
13. Merchandise may not be returned without our consent. Please call our Customer Service Department for a Return Authorization Number. All returns should be sent to our street address, prepaid. C.O.D. shipments will not be accepted. All returns must take place within thirty (30) days of receipt of goods. Depending upon the reasons for return, a re-stocking charge may be applicable. A 10% re-stocking charge will apply to authorized returns on stock items. Product must be in good condition and returned within thirty (30) days of invoice.
14. All artwork, electronic or other, whether invoiced separately or not, will remain the property of Western States Envelope & Label unless specifically stated otherwise at the time of order acceptance. Artwork sent to Western States becomes the property of Western States Envelope & Label. If it is not requested to be returned, it will be destroyed after 6 months.
15. All cutting dies remain our property.
16. If copy must be followed exactly for style, type face, or art work, customers must furnish electronic art. Otherwise we will match copy as closely as possible, by typesetting. We are always happy to send you a proof, should you request one.
17. When proof of printing copy has been sent for approval, we shall not be responsible for any errors or mistakes the customer fails to correct.

18. Due to the variety of dyes and other materials used in the manufacture of paper, we assume no liability for discoloration of the paper itself or any inks, foils, or other materials applied to the paper, whether the paper is supplied by, or specified by the customer.
19. The following conditions shall apply to orders accepted for making envelopes from paper furnished by customers.
 - a. All shipments of blank or printed flat sheets should be sent to us prepaid, not collect or C.O.D. Please include a photocopy of your purchase order, to speed the processing time within our plant.
 - b. We assume no responsibility for proper cutting of envelopes from sheets printed according to any layout not approved by us.
 - c. Such paper shall be well jogged and packaged by the customer, and shall be free of damaged edges. If jogging should be required prior to conversion, you will be billed accordingly for that additional operation.
 - d. We accept no responsibility for quantity of such paper, except on special agreement with the customer and at his expense for counting.
 - e. Due to the wide variety of different papers on the market today, the normal overrun or under run standards may not apply. Many sheets of paper will crack, tear or otherwise convert poorly, due to the nature of the sheet itself. Please consult us in advance if you have any questions.
 - f. We do not guarantee absolute conformity of location of printing on envelopes cut from paper printed on a flat sheet.
 - g. We accept no responsibility for printed stock if ink is not able to withstand roll or blade pressures and smears during any operation of the converting process.
