

# Mark Andy 2100 7" Flexographic Label Press

Maximize the potential of your business through Western State's Mark Andy 2100, 8-Color Flexographic Label Press. This 7" modular, in-line, web-converting system features independent registry controls on each unit to ensure excellent registration during printing.

Our Industry is changing faster than ever but one thing remains certain: we're here to work with you, every day. Helping you achieve the full potential of your business as only Western States can.

## Superior Print Quality & Versatility

High quality screen and process work from eight print stations allow:

- 8 spot colors.
- Precise registration with independent, four-way adjustments that assure accurate alignment of the plate roll in relation to the anilox and impression roll.
- Higher end quality (coupons, embossing, foil transfer).
- 15" print and die repeat adds optimum flexibility to layout jobs.
- Web turnbar unit can be mounted between two print stations for printing on both face and liner.

## Conversion Versatility

Our 2100 flexo label press allows printing on both sides of the web in a single pass and can be used for a wide variety of converting applications.

- Die-Cutting
- Rewinding
- Sheeting
- Perforating
- Laminating

## Additional Accessories

- Ceramic Anilox Rolls
- Laminator
- Stacker
- Underside Die-Cutting
- CK Slitter
- RD Scorer
- Waste Rewinder
- UV Curing System
