

# Mark Andy 2200 17" Flexographic Label Press

The Mark Andy 2200, 8-Color Flexographic Label Press is an in-line printing and converting press. At 17" wide this press allows for multiple die-cutting across the web. It is well suited to efficiently and economically print long manufacturing runs up to 8 colors plus an overlamine.

Our Industry is changing faster than ever but one thing remains certain: we're here to work with you, every day. Helping you achieve the full potential of your business as only Western States can.

## Superior Print Quality & Versatility

- 8 print stations allow 4 color process, 8 spot colors, or 4 color process with 4 extra units.
- Quick 'drop-in' doctor blade system provides consistent coverage and improves color control from run to run.
- Helical gearing allows for more accurate and consistent registry and reduces gear marking.
- 24" print and die repeat offers flexibility to layout jobs for optimum versatility.
- Web turnbar unit can be mounted between two print stations which allows printing on both face and liner.

## Conversion Versatility

Our 2200 flexo label press allows printing on both sides of the web in a single pass and can be used for a wide variety of converting applications.

- Die-Cutting
- Rewinding
- Sheeting
- Perforating
- Laminating

## Additional Accessories

- Ceramic Anilox Rolls
- Laminator
- Stacker
- Triple Die-Cut Module
- CK Slitter
- RD Scorer
- Turrett Rewinder
- UV Curing System
