

# Digital Inkjet Label Press

Our inkjet system provides an efficient digital platform for creating short run label orders that require versioning, localization, regionalization, language and color changes. This press is ideal for narrow web applications such as labels, tags, tickets, and forms.

## Top-Tier Quality With Flexibility

Our inkjet digital label press is nimble yet precise, offering you a flexible choice.

- Narrow web widths handle up to 8" (prints up to 7<sup>7</sup>/<sub>8</sub>").
- Over 2x faster than standard digital label presses.
- Costs less than click-charge digital models.
- Press proofs and test marketing are a snap with this press.
- Integrated with award-winning workflow technology for exceptional color reproduction.
- Eliminates the need for pre-priming most substrates.
- Eliminates plate costs and allows cost effective copy charges.

## Ideal for Many Applications

- Automotive
- Food and Beverage
- Hobbies and Collectibles
- Industrial Pressure Sensitive
- Prime Labels
- Inserts
- Cosmetics
- Health and Beauty
- Household Products
- Pharmaceutical
- Shipping Labels
- Children's Stickers

## Shapes & Styles of Labels

- Custom Shapes
- Round Corner Rectangles
- Ovals
- Circles
- Butt Cuts

## Conventional Tooling

Conventional 13" tooling can be purchased and used for projects that call for stocks unable to be laser die-cut. Existing 7" dies are available for use; however, it is important to note that these dies are tooled for 7" presses and therefore will affect the number of labels die-cut across the web.

## Press Specifications

Maximum Web Width	8"
Imaging Width	7 <sup>7</sup> / <sub>8</sub> "
Maximum Print Speed	120 fpm (37 mpm)
