

Mark Andy P5 Flexographic Label Press

Our flexo system provides an efficient platform for creating short run label orders that require versioning, localization, regionalization, language and color changes. This press is ideal for narrow web applications such as labels and inserts.

Unlimited Flexographic Print Performance with Superior Flexibility

Our P5 flexo label press is nimble yet precise, and will help you deliver consistent quality.

- 8 print stations.
- Wide web widths handle up to 13" (prints up to 12").
- Technology for exceptional color reproduction and opaque white ink density.
- Better dot reproduction that will create a high-quality 175 line screen flexo image using UV drying technology.
- Quick change over with a pre-registration system that allows for better color to color registration.
- Reduced ink and substrate waste—environmentally friendly.
- Auto registration feature assures registration tolerance of $\pm .002$ " from center point.

Ideal for Many Applications

- Automotive
- Food and Beverage
- Hobbies and Collectibles
- Industrial Pressure Sensitive
- Prime Labels
- Inserts
- Cosmetics
- Health and Beauty
- Household Products
- Shipping Labels
- Children's Stickers
- Wine and Spirits

Shapes & Styles of Labels

- Custom Shapes
- Round Corner Rectangles
- Machine Applied
- Ovals
- Circles
- Butt Cuts
- Sheeted

Base Configuration	Roll-to-Roll, Roll-to-Sheet
Converting Options	Rotary Die Cutting, 3 Die Stations, 1 Sheeting Station
Substrate Options	Paper, Supported Films, Foil, Tag & Specialty (2-14 pt.)
Backside Printing	Yes
Overlaminating	Yes

Conventional Tooling

Conventional 13" tooling can be purchased and used for projects that require this type of flexibility. Flex dies should be considered as they are a more cost effective option. Must check that we have a Magnetic Base available. Existing 7" dies are available for use; however, it is important to note that these dies are tooled for 7" presses and therefore will affect the number of labels die-cut across the web.
